

TANKFORMERS

Delivery

170517

Tankformers will endeavour to deliver your tank at a pre-arranged time but this will be subject to traffic and weather conditions. Our driver will unload and place your tank if the following conditions are met:

- * Your tank pad is complete, correct and ready.
- * The site is safe.
- * Position of the tank pad is accessible to truck and trailer

- * The tray truck is 9 metres long (plus 9.5m trailer) 2.5 meters wide and will need sufficient area to be able to turn around or back in off the road.
- * Ground conditions need to be taken into account; trucks are heavier than cars so will easily get bogged if area is not sufficiently compacted.
- * Please make sure gates, roads and overhanging limbs from trees are clear to allow safe delivery.

- * You will need able people to assist the driver in unloading your tank.
 - ** Up to 5000 Litres – our driver and 1 person
 - ** 5000 – 10000 Litres – our driver and 2 persons
 - ** 23500 Litres – our driver and 3 persons
 - ** 28000/45000 Litres – our driver and 4 persons

- * If assistance is not available on delivery, you can pre-arrange equipment to unload your tank at your cost.

If these conditions are not met, or our driver cannot access your property or tank site, your tank will be unloaded at the closest practical position; alternatively if the tank cannot be unloaded, a delivery fee will be applicable on the second delivery.
- * Should the tank need to be rolled into position on site, please inform us at time of purchase so that fittings can be done on site (fittings are normally installed prior to delivery).
- * Any damage caused by the tank being rolled or dragged across the ground will not be covered by warranty.
- * Due to OH&S and the company's policies, the driver has the final decision whether he can safely unload the tank.
- * Tankformers takes no responsibility for damage to tanks if the site is unprepared or poorly prepared.
